

peronda

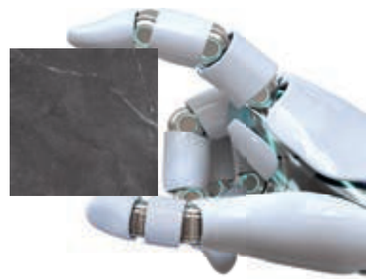

GENERAL CATALOGUE 2022-23

peronda

Pasión por el detalle

PASSION FOR DETAIL

Desde 1827, en Peronda hemos sido fieles a nuestros orígenes, a nuestra esencia. A esa pasión por el detalle que nos hace únicos desde hace casi dos siglos.

Pero también nos hemos situado siempre a la vanguardia de la innovación, manteniendo una constante adaptación y evolución a la tendencia, al avance tecnológico.

Y al contraste. Ese nudo indivisible de lo que fue y lo que será, tendiendo siempre una mano al pasado para alcanzar el mejor de los futuros.

Este catálogo es un viaje en el tiempo. Un recorrido por la evolución de creaciones y últimas novedades para descubrir que Peronda sigue siendo la misma, pero mejorada.

Since 1827, in Peronda, we have been true to our origins, to our essence. To that passion for detail making us unique for almost two centuries.

But we have always been at the forefront of innovation by maintaining a constant adaptation and evolution to the trend and technological advance.

And to contrast. That indivisible knot of what was and what will be, always lending a hand to the past to reach the best future.

This catalogue is a time travel. A journey through the evolution of creations and latest novelties to discover that Peronda is still the same, yet improved.

Peronda con el planeta

PERONDA CARES FOR THE PLANET

La ecología no es una moda. Ser respetuosos con el medio ambiente es algo que llevamos haciendo desde hace casi dos siglos. Somos conscientes de nuestra responsabilidad como fabricantes y por tanto trabajamos continuamente para minimizar nuestro impacto con el entorno.

No solo somos capaces de producir las piezas cerámicas más innovadoras, nuestro orgullo es poder decir que lo hacemos desde una óptica atemporal de respeto hacia todos aquellos que heredarán nuestro planeta.

Ecology is not a passing trend. Environmental care has been an intrinsic part of our philosophy for almost two centuries. We are aware of our responsibility as manufacturers. That's why we strive at all times to minimize our impact on the environment.

Not only are we capable of producing amazingly innovative tiles. We are also proud to say that we do it in a forward-looking way by caring for the planet so that future generations can enjoy it.

EFICIENCIA ENERGÉTICA

Optimización de todas las etapas del proceso productivo, que se traduce en una optimización de la energía consumida y en un aumento de la eficiencia.

- Instalación de recuperadores de calor y quemadores de alta eficiencia para disminuir el consumo térmico y las emisiones de CO^2.
- Instalación de luminarias tipo LED que han permitido un ahorro energético de hasta 250.000 kWh/año en consumo de energía eléctrica.
- Instalación de una planta piloto de placas solares para disminuir el consumo eléctrico y las emisiones de CO^2.
- Reducción de las emisiones de CO^2 debido a la conducción de carretillas elevadoras 100% eléctricas en toda la cadena de producción.

ENERGY EFFICIENCY

The optimization of all stages of the production process, leading to optimized energy consumption and increased efficiency.

- Installation of high efficiency heat recovery systems in order to diminish thermal demand and CO^2 emission.
- Installation of LED lamps which represents a saving of electric energy consumption of 250.000 kWh a year.
- Installation of pilot plant of solar panels to diminish electric consumption and CO^2 emmisions.
- Reduction of CO^2 emission by driving 100% electric forklifts during the whole production line.

EMISIONES ATMOSFÉRICAS

Reducción de las emisiones de CO^2 a la atmósfera y cumplimiento del Protocolo de Kioto debido a la alta eficiencia energética del proceso productivo.

La reducción del consumo de gas natural durante la producción de las baldosas cerámicas se traduce en una disminución de las emisiones de CO^2 y por lo tanto en una disminución del calentamiento global del planeta y del conocido "efecto invernadero". Todo ello se consigue debido a la aplicación de las tecnologías más avanzadas que hacen del proceso de producción de la empresa un proceso muy eficiente energéticamente.

ATMOSPHERIC EMISSIONS

A reduction in CO^2 atmospheric emissions and compliance with the Kyoto Protocol due to the high energy efficiency of the production process.

A reduction in the consumption of natural gas during the tile manufacturing process leads to a drop in CO^2 emissions and, by extension, it helps to slow down the global warming caused by greenhouse gas emissions. All this is achieved by using cutting-edge technologies so that the company's production process is a highly energy efficient one.

PROCESOS SOSTENIBLES

- Utilización de una tecnología limpia basada en el uso de tintas en base agua para la decoración digital de las baldosas cerámicas, evitando la generación de residuos de disolvente y haciendo el proceso de decoración digital más sostenible.
- Todos nuestros productos son envasados en embalajes de cartón 100% reciclados. Anualmente ponemos al mercado un total de más de 600.000 Kg. de cartón reciclado.
- Reducción en un 95% del consumo de plástico debido a la sustitución de embalajes de plástico por embalajes de cartón reciclado en la paquetería comercial.

SUSTAINABLE TECHNOLOGIES

- Use of clean technologies based on water inks in the ceramic tiles digital decoration. In this way, we avoid solvent waste.
- Every product packing is made of 100% recycled carton. Yearly we place in market more than 600.000 Kg of recycled paper.
- Reduction of 95% of consumption of plastic thanks to replacement of plastic packaging into recycled carton in every parcel.

ECONOMÍA CIRCULAR

Reutilización en el proceso productivo de las aguas residuales generadas y del polvo atomizado y tiesto crudo, reduciéndose el consumo de materias primas.
Reutilización del 100% del material crudo sobrante del proceso de producción. Más de 9.000.000 kg. de material sobrante del proceso de producción reutilizado.
(Ver porcentaje de recursos reutilizados por colección en la página 485.)

Gracias a la reutilización de estos residuos generados en el proceso de fabricación, se disminuye el consumo tanto de agua como de materia prima arcillosa, con lo que se disminuyen las explotaciones para conseguir los recursos naturales utilizados, aumentando su sostenibilidad con el tiempo para que generaciones futuras puedan optar a ellos.

CIRCULAR ECONOMY

Re-using wastewater, particles of powder and unfired waste clay in the production process, hence reducing the consumption of raw materials.
We reuse the 100% of wasted raw material during the production process. More than 9.000.000 Kg of wasted material is reused in a year.
(See page 485 for the percentage of re-used raw materials per collection.)

By re-using these waste products from the production process, savings on water consumption and clay raw materials are achieved, thus reducing the amount of natural resources that need to be harvested and helping to conserve them for future generations.

GESTIÓN DE RESIDUOS

Minimización de los impactos ambientales generados durante nuestro proceso de producción.

Como todo proceso de producción, la fabricación de baldosas cerámicas genera una serie de residuos, que son gestionados mediante gestores autorizados, reduciéndose de este modo los impactos medioambientales asociados.
- 100% de reciclado del plástico, cartón y flejes sobrantes del proceso de producción.
- Las baldosas cerámicas tienen una vida útil de 50 años lo que se traduce en una falta de generación de residuos sólidos durante todo ese tiempo.
- Adhesión a ECOEMBES – entidad sin ánimo de lucro encargada de la recuperación de envases en toda España.

WASTE MANAGEMENT

The minimization of all environmental impacts from the production process.

Like all production processes, a series of waste materials are generated during the tile manufacturing process. These are managed by authorized waste management agencies, hence reducing associated environmental impacts.
- 100% recycling of plastic, carton and strapping wasting during production.
- Ceramic tiles have a service life of more than 50 years and this fact reduces solid waste during all this time.
- Joining ECOEMBES – Nonprofit organization that cares for the environment through recycling packaging in Spain.

VERTIDO CERO

Reutilización del 100% de las aguas residuales procedentes del proceso productivo. Más de 18.000.000 litros de agua anuales reciclados.

La generación de las aguas residuales es un aspecto medioambiental significativo en el proceso de fabricación de baldosas cerámicas. Se debe principalmente a las operaciones de limpieza y aplicación de los esmaltes.
Estas aguas residuales se reutilizan en el proceso de producción al preparar las materias primas arcillosas necesarias para el conformado del soporte cerámico. Por lo tanto no existe vertido de aguas residuales, que se conoce como vertido cero.

ZERO DISCHARGE

We reuse the 100% of wastewater coming from the production process. More than 18.000.000 liters are recycled yearly.

Wastewater generation is an important environmental factor in ceramic tile manufacturing. This wastewater mainly comes from cleaning operations and the glazing process. Peronda re-uses wastewater in the production process as a raw material in the preparation of the clay materials used to make the tile bodies of its products, involving wet-milling and spray-drying processes. This means that there is no discharge of wastewater, technically known as zero discharge.

VIDA ÚTIL

Las baldosas cerámicas son uno de los materiales de la construcción de mayor vida útil, reduciendo de este modo el volumen de residuos generados.

La vida útil de una baldosa cerámica se estima en 50 años, con lo que se consigue que el impacto ambiental asociado a cada una de ellas sea bajo. La larga vida útil que presentan se traduce en una disminución de los residuos sólidos o de demolición generados. Además, y debido a que es inerte, no requiere de consumos energéticos para su correcto funcionamiento cuando está instalada en cualquier edificio, con lo que se disminuyen aún más los impactos medioambientales asociados.

SERVICE LIFE

Ceramic tiles are one of the building materials with the longest service life, thus reducing the amount of waste that is generated.

Ceramic tiles have an estimated service life of 50 years, and so each tile has a low environmental impact. This long service life leads to a decrease in generated solid waste or debris from demolitions. Moreover, because ceramic tiles are inert products, they require no energy consumption once they have been laid in buildings, further minimizing the associated environmental impacts.

NMD SYSTEM

NOMAD SYSTEM

Time to renew

+ NOMAD **es la solución revolucionaria de construcción en seco** de Peronda, que usa un innovador sistema de sujeción magnética: Simple, funcional, ecológico.

+ NOMAD aplica un recubrimiento **ferromagnético** a la cerámica. La instalación de las piezas se realiza sobre superficies capaces de generar adhesión magnética permanente e inocua para la salud.

+ La cerámica magnética de NOMAD aúna **sostenibilidad y rentabilidad.**

PERONDA ofrece con NOMAD una **mejora operativa,** por la combinación de la reducción del tiempo de montaje y la ausencia de residuos. Y esto se une a los nuevos usos del material, gracias a que NOMAD **permite una fácil reutilización de las piezas.**

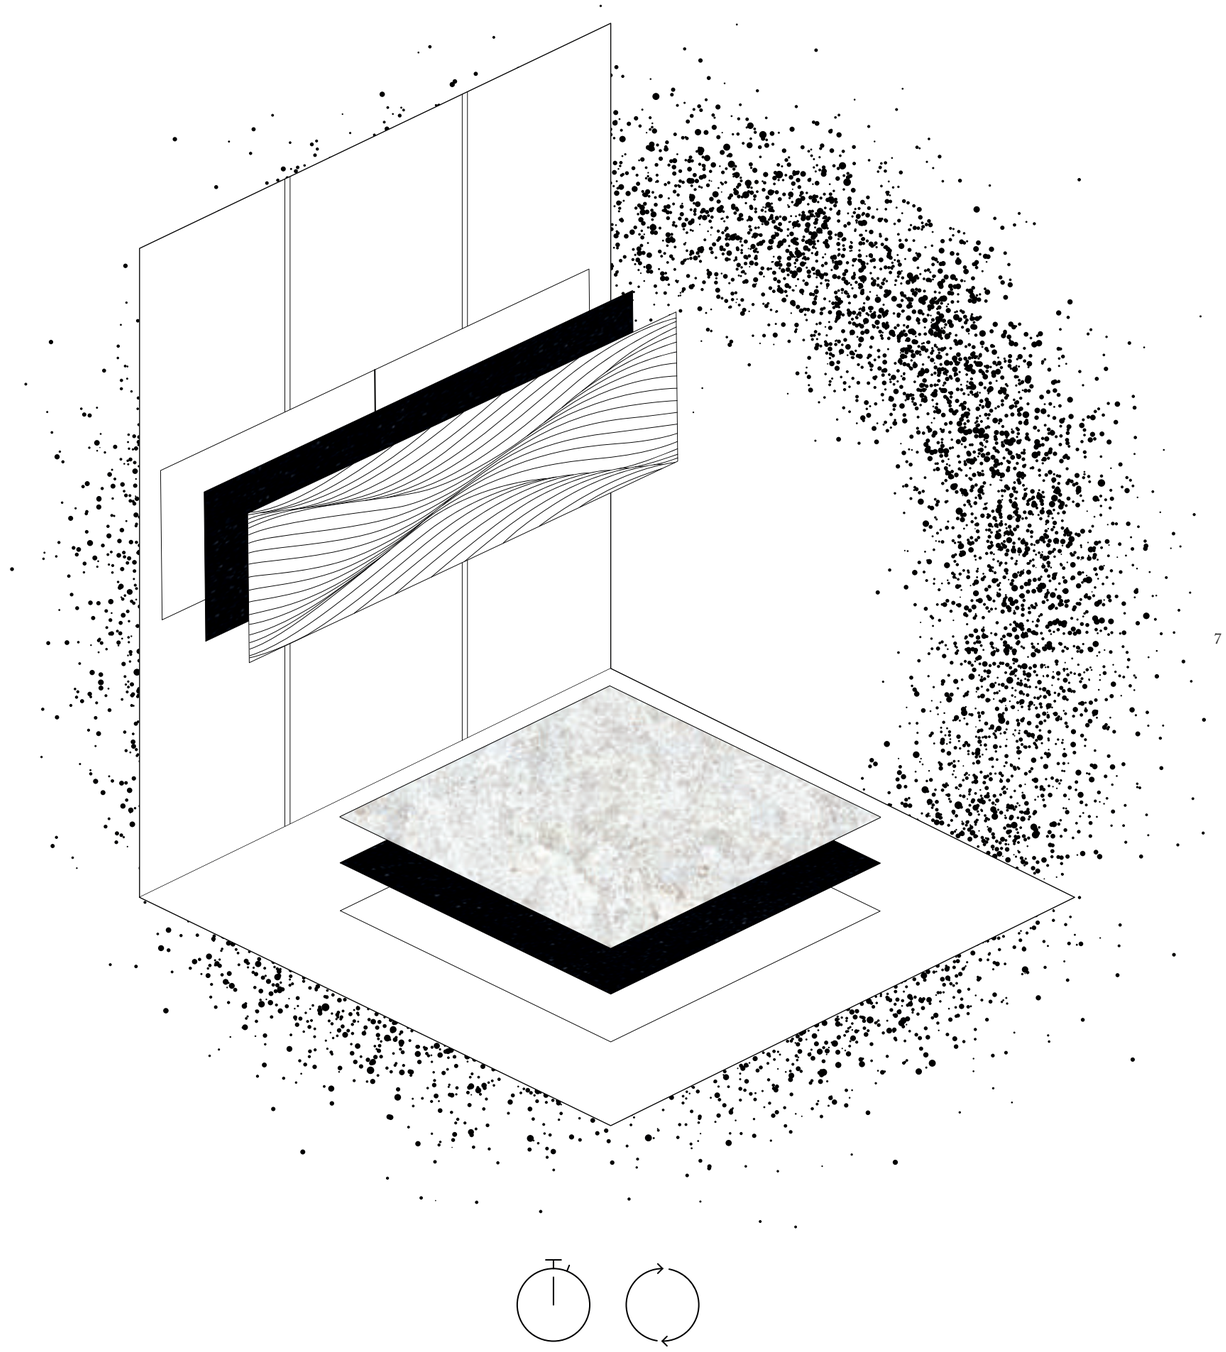

+ NOMAD **is Peronda's revolutionary dry tile-laying solution**, based on an innovative magnetic anchorage system. It is simple, functional and eco-friendly.

+ With NOMAD, a **ferromagnetic** coating is applied to the ceramic tiles. The tiles are then laid on surfaces able to create a permanent tight magnetic bond, with no harmless effects on people's health.

+ NOMAD's magnetic tiles unite **sustainability with higher cost-effectiveness**.

With this system, Peronda **guarantees easier installation processes** through a reduction in assembly times and no building residues. The tiles can also be repurposed because, thanks to NOMAD, **they can easily be re-used elsewhere.**

Usos ilimitados. Misma superficie

¿Imaginas poder tener un mismo suelo con iguales cualidades en todos los espacios de tus proyectos? El acabado All in one aúna suavidad y antideslizamiento. Ahora no hay por qué elegir, puedes tenerlo todo en un único producto.

Mayor suavidad y limpieza

Hasta ahora, las zonas húmedas estaban condenadas a la rugosidad. Ahora son más agradables y fáciles de limpiar gracias a la suavidad que nos aporta este nuevo acabado de Peronda.

Menor stock

El nuevo acabado All in one de Peronda es la mejor manera de optimizar el negocio, al permitirnos reducir stocks con este producto All in one. Con solo una referencia, somos capaces de satisfacer las diversas necesidades técnicas de tus proyectos.

Mayor armonía

Ya podemos salir del salón a la terraza sin depender de los formatos ni de los tonos. La colocación del material sin límites nos aporta esa sensación de continuidad estética que tanto nos gusta.

Unlimited purposes. Same surface

Can you imagine having the very same flooring with identical features in every single space of your project? All in one finish brings softness and anti slip treatment together. There is no need to choose any more. You can have it all in just one product.

More softness and cleanliness

Up to now, humid areas were doomed to roughness. They are nicer and easier to clean now thanks to the softness this brand-new Peronda's finish brings us.

Less stock

Peronda's new finish All in one is the best way to optimise business, for it lets us reduce the stock by using this all-in-one product. Just with one reference, we can satisfy the many technical needs of your project.

More harmony

We can already come out on the terrace regardless of neither formats nor tones. Unlimited ways of placing materials gives us a feeling of aesthetic continuation we really like.

ALL IN ONE

Antislip Soft. Unlimited purposes

SHAPED TECH

Multi texture surface

Natural

Las texturas, los recovecos, las vetas que crea la naturaleza son caprichosas, y esa es la fuente de su belleza. No hay dos iguales, y en su singularidad radica su belleza.

La pasión por la búsqueda del detalle ha llevado a Peronda a desarrollar una tecnología capaz de reproducir la naturaleza en su máxima expresión, que es captando hasta el mínimo detalle.

Los relieves son creados con tecnología digital perfectamente coordinada con la impresión gráfica para generar las piezas más naturales vistas en cerámica.

Preciso

Donde ponemos el relieve ponemos la tinta. La precisión con la que imprimimos nuestras piezas es milimétrica, pues relieve y gráfica casan a la perfección para obtener un resultado técnicamente inmejorable.

Real

Nada de ilusiones ópticas, esto es real. Lo que ves y lo que tocas es lo mismo. La veta está donde está el relieve y viceversa. Lo que siempre quisimos en cerámica, ahora lo consigue Peronda.

Natural

The textures, sinuosity and veining found in nature all follow capricious rules, and it is this random nature that makes them so very lovely. Nothing is ever identical and this singularity is the secret to nature's beauty.

Peronda's passion for detail has led it to develop technology able to reproduce nature in its maximum of expressions, captured down to the tiniest of details.

Digital technology is used to create textures that coincide perfectly with the printed pattern, leading to some of the most natural looking designs ever to be seen on ceramic tiles.

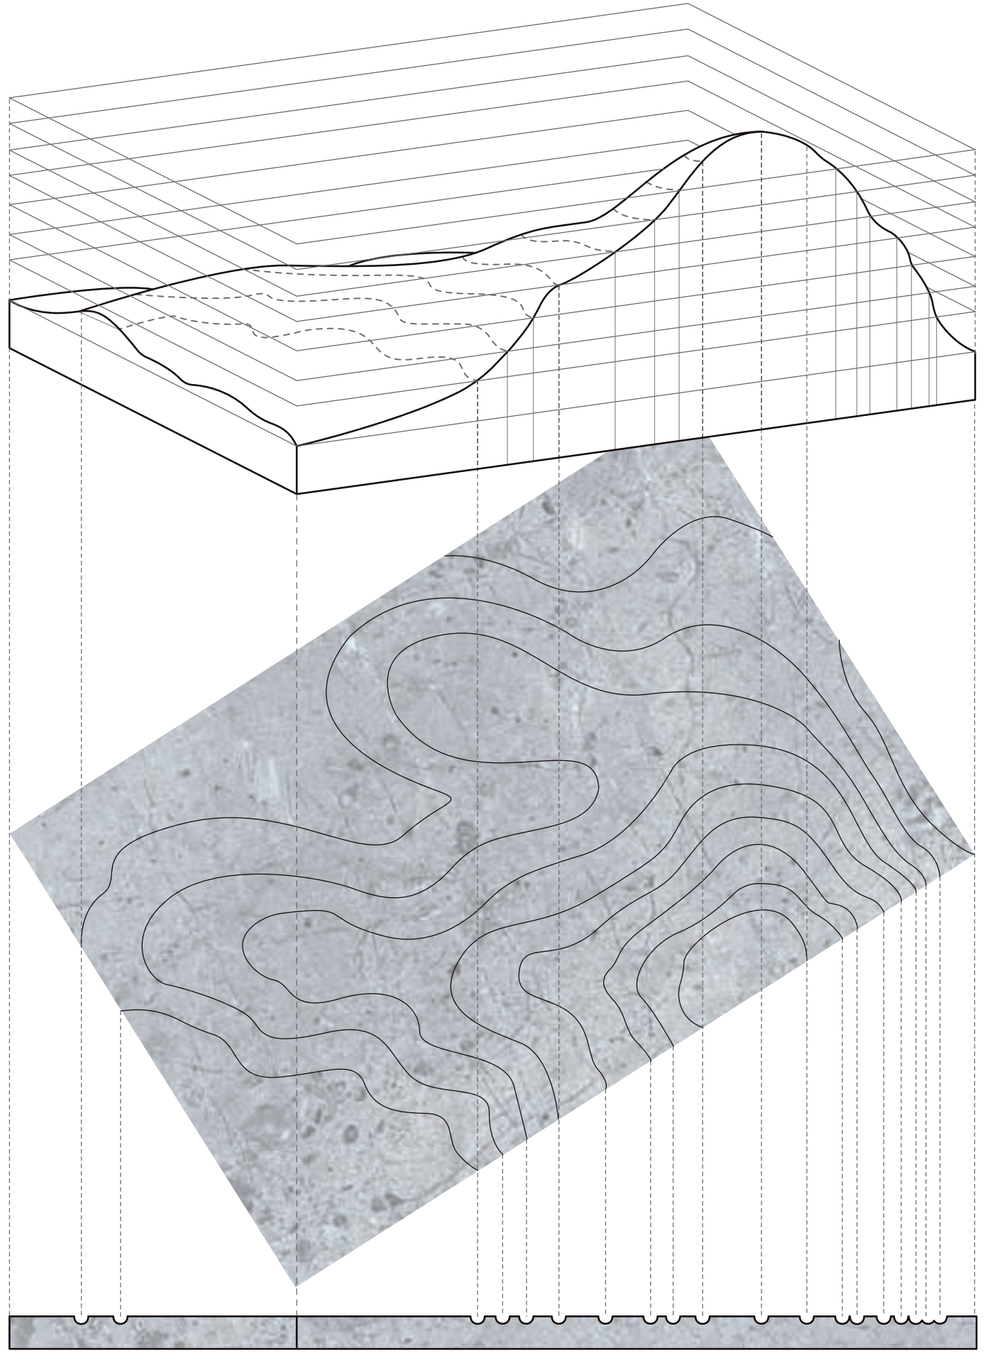

Preciso

Our printing inks reach each and every part of the printed texture. The tiles are printed with absolute precision, carefully marrying the design with the corresponding texture to unparalleled technical effect.

Real

There are no optical illusions. Everything is real. What you see and what you touch are one and the same thing. The printed veins coincide perfectly with the texture. Everything you have always longed for in ceramic tiles has now been achieved by Peronda.

Accede al código QR y conoce a fondo nuestra tecnología SHAPED TECH.
Enter with the QR code and learn all about our SHAPED TECH technology.

HONED

The value of the passing of time

Eterno

Brillo satinado irregular que nos evoca el resultado del paso del tiempo sobre una superficie noble. La belleza de los elementos que cuanto más envejecen mayor valor tienen, más bonitos son, más historias atesoran.

Todo ello ligado a un tacto especialmente suave que transforma cualquier interior en un lugar especial, cálido, donde nos sentimos cómodos y seguros.

Eternal

Uneven polished brightness evoking the result of the passing of time on a fine surface. The beauty of elements that the more they get old, the more value they have, the more beautiful they are and the more number of stories they treasure.

All of this is bound to quite a soft touch that turns any indoor area into a special, warm place where we feel safe and comfortable.

Accede al código QR y conoce a fondo nuestra tecnología HONED.
Enter with the QR code and learn all about our HONED technology.

SOFT

The smoothest one

Suave, sedoso y fácil de limpiar

El acabado SOFT es la perfecta elección para hacer de cualquier espacio un lugar más confortable.

Gracias a su material sedoso, ofrece una superficie de extrema suavidad muy fácil de limpiar, pues impide que la suciedad se adhiera.

El broche ideal para tu vivienda o local comercial.

Smooth, silky and easy to clean

SOFT is a finish conceived to bring added comfort and convenience to settings of all kinds.

Thanks to its silky feel, this is a very smooth, easy-to-clean surface since it prevents the build-up of dirt.

The perfect crowning touch to homes or commercial premises!

EXTRAWHITE

Con todos los esfuerzos tecnológicos concentrados en nuevas formulaciones de esmaltes, podemos ofrecer el blanco cerámico más puro hasta la fecha, que cuenta además con una suavidad incomparable.

Se trata del acabado Extrawhite presente en las colecciones ICE y COTTON. Los espacios se tornan más luminosos, neutros y confortables aportando así el valor diferencial que continuamente ofrecen nuestros productos, resultado de nuestra conocida pasión por el detalle.

Thanks to the technological efforts we channel into finding new glaze formulae, we have come up with the most ultra-white tile finish to date, with the added benefit of an unparalleled smooth surface.

This is our Extrawhite finish, available in the ICE and COTTON collections. Extrawhite infuses settings with a more luminous, neutral, comfortable appearance, lending them that singular appeal that all our products offer, thanks to Peronda's well-known passion for detail.

LAYER TECH

Multi texture surface

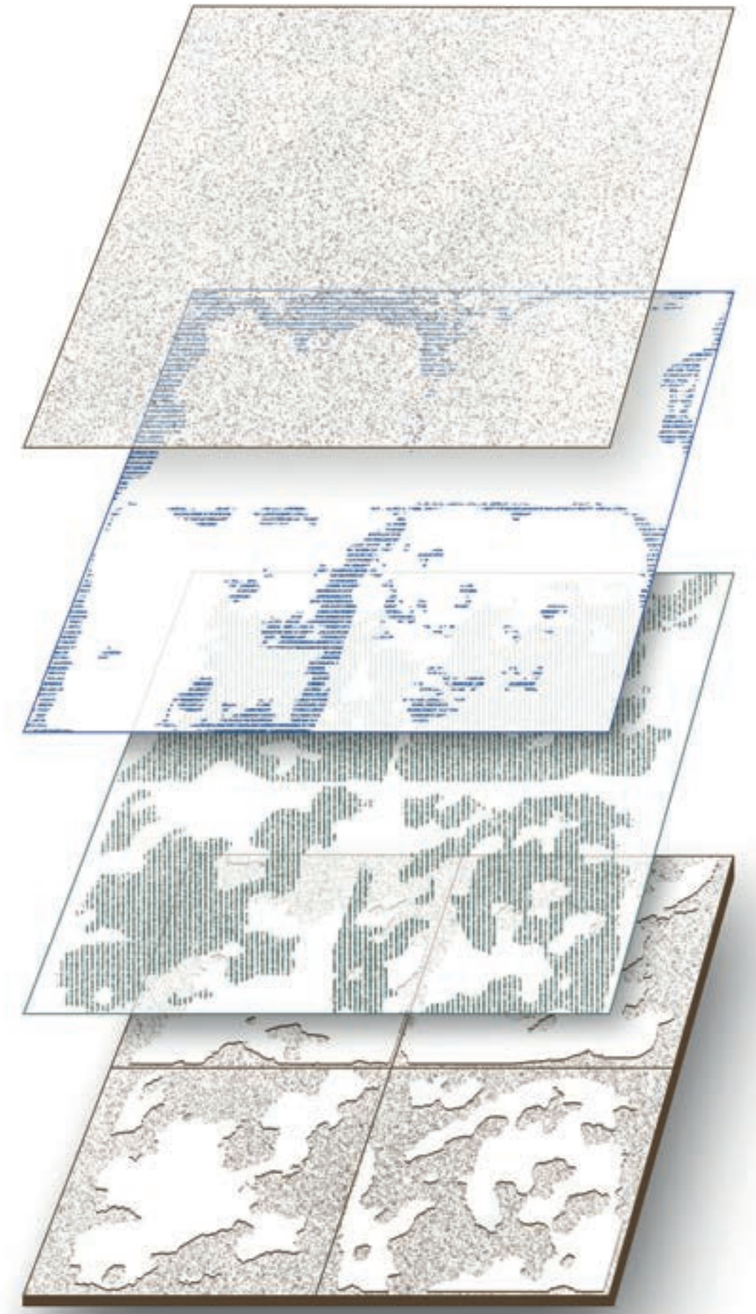

Layer Tech es la última tecnología de decoración cerámica, que permite crear texturas en diferentes capas de la superficie generando efectos variados en una misma pieza. Acabados espectaculares hasta ahora imposibles de conseguir en cerámica.

Con esta técnica se abre un infinito abanico de posibilidades en decoración cerámica puesto que se trata de combinar distintas materias, colores y formas en un proceso de adición en el que cada combinación puede generar un efecto totalmente nuevo y sorprendente.

Layer Tech is the latest in tile printing technology. With it, textures can be created on different surface layers, generating varying effects on the same tile. This leads to hitherto unimaginable spectacular finishes on the tiles.

Layer Tech technology opens up endless new possibilities in ceramic tile printing, since different materials, colours and shapes can be combined. In this additive process, each combination gives rise to a totally new amazing effect.

4D® TECH

MADE OFF peronda

El futuro cerámico no es qué. Es cómo

4D TECH es el sistema de producción cerámica más innovador del mercado. Un nuevo estándar para la máxima calidad.

With technology as our ace card

4D TECH is the most innovative tile manufacturing system on the market, raising standards in a bid to achieve maximum quality.

El nuevo Peronda de siempre

Nueva tecnología, mismos valores. 4DTECH aporta mayor precisión, versatilidad y eficiencia sin olvidar la calidad y la sostenibilidad.

A new yet familiar Peronda

New technology but still the same values. 4DTECH ensures greater precision, versatility and efficiency, not to mention quality and sustainability.

MÁS ES MÁS

Nuevos formatos, no solo más grandes si no también más variedad de tamaños. Nuevos formatos hasta ahora impensables en cerámica.

EVEN MORE FORMATS

New formats – not just bigger ones but more widely assorted sizes. New sizes that were hitherto unconceivable in ceramic tiles.

DETALLES NUNCA VISTOS

La nueva tecnología 4DTECH confiere a los productos una precisión hasta ahora desconocida. Mayor definición en los detalles y unos efectos que siguen mejorando la realidad que nos inspira.

SIMPLY AMAZING DETAIL

With new 4DTECH technology, a hitherto impossible degree of precision has been achieved. Higher-definition finer details and effects that continue to improve on our real sources of inspiration.

CREATIVIDAD SIN LÍMITES

Las colecciones desarrolladas con las capacidades 4DTECH elevan el diseño a una nueva dimensión gracias a nuevas posibilidades matéricas y estéticas con las que enriquecer los productos.

LIMITLESS CREATIVITY

Collections developed with 4TECH and its improved technology break new ground in design, thanks to its new aesthetic and material-related potential for enriching products.

APOSTAR POR LA INNOVACIÓN

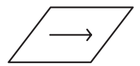

Con la implantación de la nueva tecnología 4DTECH Peronda demuestra una vez más estar a la cabeza de la innovación en la industria cerámica garantizando así su crecimiento, siempre fiel a la máxima calidad.

COMMITTED TO INNOVATION

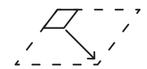

With the arrival of new 4DTECH technology, Peronda has yet again demonstrated that it is a trailblazer in the introduction of tile innovations, hence guaranteeing its growth through an ongoing search for maximum quality.

peronda.com

Nuevas herramientas digitales

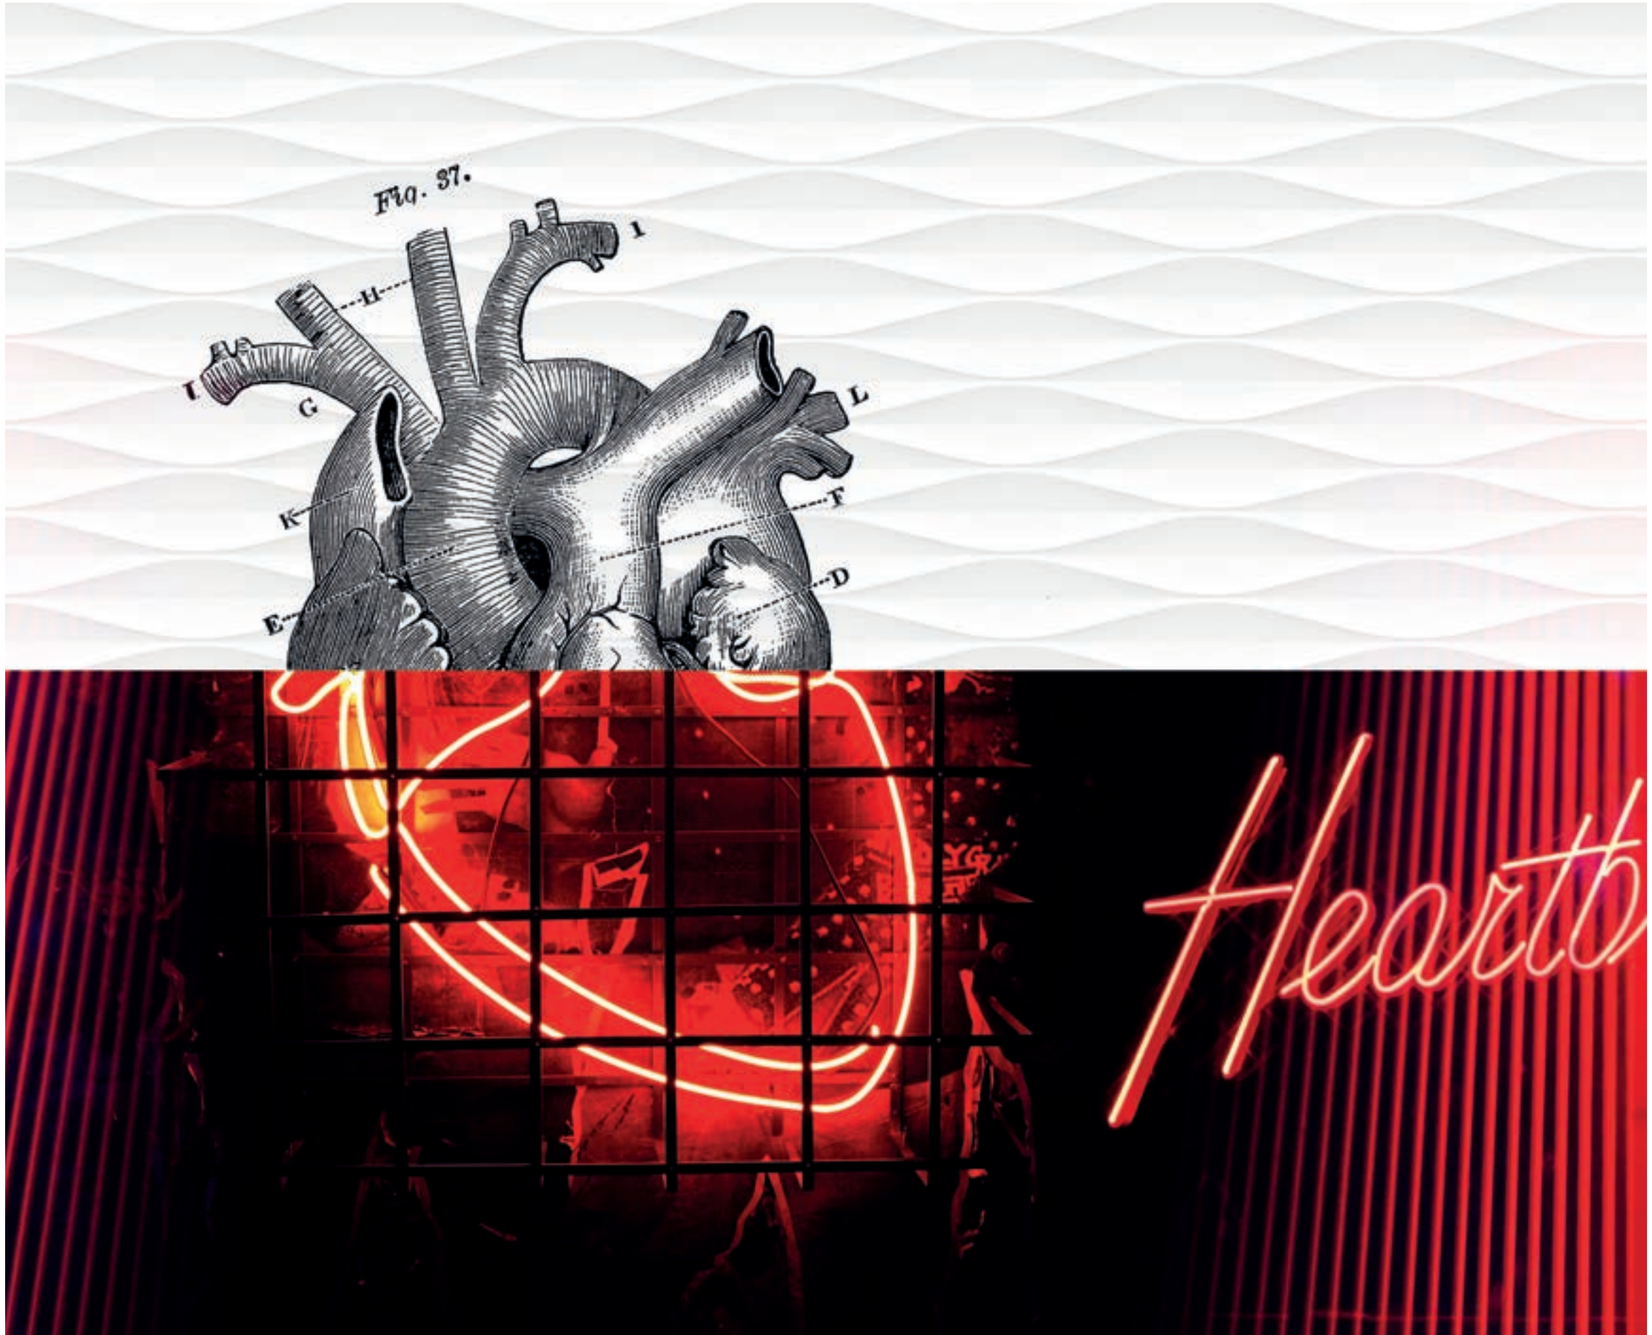

NEW DIGITAL TOOLS

En Peronda estamos comprometidos con el detalle a todos los niveles, por ello te ofrecemos diferentes maneras de vivir la experiencia de la marca, ahora, a nivel digital. Accediendo a la microweb news.peronda.com tienes a tu disposición contenido específico para que puedas explorar las últimas novedades de una forma mucho más visual: videos, ambientes, catálogos…lo último de lo último en un solo clic. También pensamos en facilitarte la experiencia de venta con tus clientes. Por ello ponemos a tu disposición, en www.peronda.com/3D, un sencillo programa para que puedas inspirar con toda la oferta de Peronda. Simplemente selecciona un ambiente, marca la superficie que quieras y elige un producto. En menos de un minuto estarás mostrando multitud de propuestas estéticas que seguro ayudarán a conquistar los deseos de tu cliente.

Peronda is committed to detail at every level, which is why we offer you different ways of experiencing the brand – the latest one online! By visiting the microweb news.peronda.com you can access specific content to explore the latest products in a much more visual way: videos, settings, catalogues… all the most recent updates with a single click. We've also given a lot of thought about how to enhance the sales experience with your customers. We therefore offer a simple programme at www.peronda.com/3D where you can inspire them with the full range by Peronda. Simply select a setting, enter the surface area you want, and choose a product. In less than one minute you can show them all kinds of aesthetic ideas that are bound to help you fulfil your customers' wishes

Accede al código QR y diseña tu propio espacio con nuestro CONFIGURADOR 3D.
Enter with the QR code and design your own space with our 3D SETTINGS VISUALIZER.

Acabados FINISHES

ALL IN ONE_AS

Usos ilimitados, misma superficie.
El acabado All in one aúna suavidad y antideslizamiento. Ahora no hay por qué elegir, puedes tenerlo todo en un único producto.

Unlimited purposes, same surface.
All in one finish brings softness and anti slip treatment together. There is no need to choose any more. You can have it all in just one product.

SHAPED_SP

Relieves creados de manera digital perfectamente coordinados con la impresión gráfica para generar las piezas más naturales nunca vistas en cerámica.

The latest in tile printing technology. With it, textures can be created on different surface layers in a digital way.

HONED_HO

Brillo satinado irregular que nos evoca el resultado del paso del tiempo sobre una superficie noble.

Uneven polished brightness evoking the result of the passing of time on a fine surface.

SOFT_SF

Acabado suave y sofisticado en superficies mates de fácil limpieza que enfatiza el detalle del producto.

A soft sophisticated matt finish, conceived to enhance the features of the tile design, on an easy-to-clean surface.

EXTRAWHITE

Gracias a los esfuerzos tecnológicos concentrados en nuevas formulaciones de esmaltes, podemos ofrecer el blanco cerámico más puro hasta la fecha.

Thanks to the technological efforts we channel into finding new glaze formulae, we have come up with the most ultra-white tile finish to date.

LAYER TECH_LT

Última tecnología de decoración cerámica, que permite crear texturas en diferentes capas de la superficie de manera digital.

The latest in tile printing technology. With it, textures can be created on different surface layers in a digital way.

NATURAL_NT

Acabado inherente al producto cerámico cuidando los atributos naturales del mismo para potenciar el detalle de su gráfica.

The tile's natural finish, conserving all its natural characteristics so as to enhance the details of its pattern.

LAPADO_LA

Superficies semipulidas que aportan brillo natural a cualquier tipo de espacio.

A semi-polished surface that brings a natural shine to all settings where it is used.

ANTISLIP_A

Porcelánicos de aspecto mate y una delicada textura con características antideslizante.

Matt porcelain tiles with a delicate texture and non-slip grip.

BUSH HAMMERED_BHMR

Suave relieve que confiere textura en superficies de aspecto mate y tacto único.

A matt surface with a gentle relief texture and unique feel.

ANTISLIP BUSH HAMMERED_ABHMR

Porcelánico antideslizante con rugosidad imperceptible al tacto.

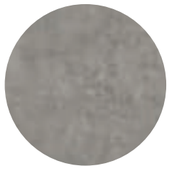

Non-slip porcelain tiles, with a roughness imperceptible to the touch.

Instrucciones uso software 3d web peronda

1 · HAZ CLIC EN EL APARTADO “3D” DEL MENÚ EN NUESTRA WEB WWW.PERONDA.COM ·

2 · SELECCIONA LOS PRODUCTOS QUE VAS A UTILIZAR EN EL ESPACIO A DISEÑAR ·

En el menú de la derecha puedes seleccionar en “Marcas” tanto los productos de Peronda para revestir la estancia como resto de elementos constructivos y decorativos para diseñar el baño, cocina o salón que desees. Los productos seleccionados irán apareciendo en la zona inferior de la imagen.

3 · DIBUJA LA ESTANCIA ·

Arrastra con el botón izquierdo del ratón las paredes simuladas en la zona central de la imagen para ajustar el tamaño de la estancia.
En la parte inferior de la imagen tienes a tu disposición distintos elementos constructivos que te ayudarán a confeccionar el espacio. En el menú de la derecha puedes ajustar las medidas y otros detalles de los elementos utilizados.

4 · COLOCAR ARTÍCULOS SELECCIONADOS ·

Haz clic en el icono “Colocar” de la parte inferior de la pantalla y podrás ubicar todos los elementos que has seleccionado en el primer paso del proceso. En la zona central de la pantalla verás una única pared cada vez. Haciendo clic en las diferentes partes del plano situado en la parte superior izquierda de la pantalla puedes moverte por las paredes y suelo de la estancia.
Selecciona los elementos de la parte inferior de la pantalla y arrástralos dentro del dibujo con el botón izquierdo del ratón. Se colocarán en el momento que sueltes el botón.
En cuanto a la cerámica, al hacer clic sobre el azulejo seleccionado se generará en el dibujo de la estancia un patrón de colocación. Lo único que tienes que hacer es mantener pulsado el botón izquierdo del ratón y arrastrar por toda la estancia para colocar la cerámica. Al soltar el botón tendrás el producto colocado.

5 · GENERAR IMAGEN ·

Una vez colocados todos los elementos en la estancia hacemos clic en el botón inferior derecho “Resumir”. El software nos muestra la estancia en 3D. Para recibir en nuestro email una imagen fotorealista de la estancia solo tenemos que hacer clic en el icono “pdf”. Rellenaremos nuestros datos y en cuestión de segundos recibiremos un email con la foto y todos los detalles del proyecto.

Instructions for using the 3d software on peronda’s website

1 · CLICK ON “3D” IN THE WWW.PERONDA.COM WEBSITE MENU ·

2 · CHOOSE THE PRODUCTS FOR THE ROOM TO BE DESIGNED ·

In the “Brands” section of the right-hand menu, you can choose products by Peronda to tile the room and other decorative or architectural features to design your envisaged bathroom, kitchen or living room.

3 · DRAW THE ROOM ·

Using the left-hand button of the mouse, drag the walls in the middle of the image to the size of your required room.
At the bottom of the image, you will find various different architectural features that can be used in the drawing. You can use the right-hand menu to adjust the size and other details of the selected features.

4 · POSITION THE SELECTED ITEMS ·

Click on the “Position” button at the bottom of the screen to position all the items you selected in step one. In the middle of the screen, one wall at a time will be shown. By clicking on the different parts of the plan in the top left-hand corner of the screen, you can move around the walls and floors of the room. Choose the items from the lower part of the screen and drag them into the drawing, using the left-hand button of the mouse. When you release the button, they will remain in position.
When you click on a selected tile model, a tile-laying grid will appear in the drawing. Just keep the left-hand button of the mouse held down and drag the tile across the surface to lay it. When you release the button, the tiles will be laid.

5 · GENERATING AN IMAGE ·

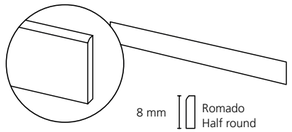

Once all the items have been properly positioned, click on the “Summarize” button in the bottom right-hand corner and the software will show you a 3D render of the room. To receive an e-mail with a photorealistic image of the room, just click on the “pdf” button. Fill in your details and, in a matter of a few seconds, you will receive an e-mail with the photo and full details of the project.

Información técnica

· NORMAS ISO ·

Normas de producto acabado ·

Según la norma de especificaciones UNE-EN-14411, nuestros productos pertenecen a los siguientes grupos:

GRES PORCELÁNICO: grupo BIa, baldosas prensadas en seco, con una absorción de agua E≤0.5%.
GRES: grupo BIIa, baldosas prensadas en seco, 3<E≤6%.
REVESTIMIENTO: grupo BIII, baldosas en seco, E>10%.

Normas de ensayo

ISO 10545-2: Determinación de las dimensiones
Establece métodos para la determinación de las características dimensionales (longitud, anchura, grosor, rectitud de lados, ortogonalidad y planitud de superficie).

ISO 10545-3: Determinación de la absorción de agua
La absorción de agua es una medida de la mayor o menor porosidad del soporte cerámico. El ensayo determina la cantidad de agua que absorben las piezas, sumergidas en agua a ebullición durante dos horas.
Se expresa en % de agua absorbida respecto a la masa en seco de las piezas.

ISO 10545-4: Determinación de la resistencia a la flexión
Se determina la resistencia a la flexión de una baldosa, aplicando una fuerza en el centro de la cara vista. La fuerza aplicada va en aumento hasta conseguir romper la baldosa. La resistencia a la flexión se expresa en N/mm^2.

ISO 10545-7: Determinación de la abrasión superficial de las baldosas esmaltadas
Determinación de la resistencia a la abrasión del esmalte de las baldosas, por rotación de una carga abrasiva sobre la superficie y comparación visual de baldosas sometidas y no sometidas al ensayo. La clasificación varía de PEI 1 hasta 5.
Para el uso correcto de un pavimento cerámico, hay que conocer la resistencia al desgaste del mismo. La cual está influenciada, no sólo por sus características, sino también por el lugar donde se va a instalar. La presencia de materiales abrasivos (arena, gravilla, ...), así como los locales con acceso directo desde el exterior, son factores que acortan la duración del pavimento.
Nuestros pavimentos han sido clasificados en cinco grupos, que establecen su resistencia a la abrasión y al desgaste:
PEI 1: Pavimentos sometidos a tráfico ligero, donde se utiliza calzado suave y exento de productos abrasivos. Recomendado en dormitorios y cuartos de baño de viviendas privadas, sin contacto con el exterior.
PEI 2: Pavimentos sometidos a tráfico medio-ligero, donde se utiliza calzado suave. Recomendado en todas las viviendas unifamiliares con excepción de cocinas, entradas, escaleras y terrazas.
PEI 3: Pavimentos sometidos a tráfico medio, donde se utiliza calzado normal. Recomendado en todas las habitaciones de las viviendas privadas y de hoteles, a excepción de las zonas comunes, como escaleras, entradas, etc.
PEI 4: Pavimentos sometidos a tráfico medio-alto. Recomendado en todo tipo de viviendas colectivas y unifamiliares, terrazas, cocinas, despachos y oficinas. No pertenecen a este grupo todos los lugares públicos sometidos a tráfico intenso, como estancos, puestos de periódicos, panaderías, barras de bar, estaciones de transporte público, etc.
PEI 5: Pavimentos adaptados a tráfico muy intenso. Recomendado en centros comerciales, estaciones, aeropuertos, etc.

ISO 10545-9: Resistencia al choque térmico
Determinación de la resistencia al choque térmico de una baldosa entera sometida a diez ciclos de variación de temperatura entre 15ºC y 145ºC .

EN-101: Dureza superficial
La dureza superficial determina la capacidad de resistencia de la superficie del esmalte al rayado. Las baldosas se clasifican en una escala de 1 a 10 en función de la dureza creciente de los minerales utilizados para rayarla.
La escala de dureza MOHS es la siguiente:

1 talco - 2 yeso - 3 calcita - 4 fluorita - 5 apatito - 6 feldespato - 7 cuarzo - 8 topacio - 9 corindón - 10 diamante.

ISO 10545-11: Determinación de la resistencia al cuarteo
Determinación de la resistencia a la formación de fisuras del esmalte, sometiendo baldosas enteras al vapor, a la presión de 5 Kg/cm^2 en un autoclave y después examinándolas en busca de fisuras tras la aplicación de un tinte en la cara esmaltada.

ISO 10545-12: Determinación de la resistencia a la helada
Establece un método mediante el cual, se impregnan de agua las baldosas enteras y se someten posteriormente a 100 ciclos de congelación-deshielo, entre + 5ºC y - 5ºC.

DIN-51130: Determinación del ángulo crítico de deslizamiento. Rampa
Este método también se llama "método de la rampa inclinada". Sobre una plataforma, que se puede regular en altura, se colocan las baldosas a ensayar ocupando una superficie total de 100 cm x 50 cm. Seguidamente se aplica uniformemente una capa de aceite sobre dicha superficie y en las suelas de los zapatos del técnico que realizará el ensayo.
La plataforma, sobre la que camina un técnico, incrementa progresivamente el ángulo respecto de la horizontal, hasta que detecta indicios de deslizamiento. Como resultado se obtiene el ángulo máximo que permite una circulación segura sobre el pavimento.

Ángulo	Grupo
6°< a <10°	R9
10°< a <19°	R10
19°< a <27°	R11
27°< a <35°	R12
35°< a	R13

UNE-41901 EX: Determinación del valor de la resistencia al deslizamiento. Péndulo
El equipo consiste en un péndulo de longitud de brazo 510 mm, que soporta un deslizador de caucho de dimensiones 76x25 mm. La altura del equipo se ajusta para conseguir que el deslizador, mantenga el contacto con la superficie durante un recorrido de 126+1 mm.
La muestra se sumerge en agua durante un mínimo de 30 minutos previamente al ensayo. Cada baldosa se ensaya en dos direcciones opuestas (0º y 180º) estando su superficie saturada de agua destilada.

Rd	Clase
Rd < 15	0
15< Rd <35	1
35< Rd <45	2
Rd>45	3

ISO 10545-13: Determinación de la resistencia química
Dicho ensayo determina, por separado, la resistencia química de las baldosas, a los agentes de limpieza, sales de piscina, ácidos y álcalis. Con la exclusión del ácido fluorhídrico (HF) y sus compuestos.
La clasificación visual para ácidos y álcalis de concentración fuerte varía desde HA, HB y HC, para ácidos y bases de concentración débil desde LA, LB y LC, y para productos de limpieza y sales de piscina entre A, B y C, en función de la resistencia química.

A – Sin efecto visible,
B – Clara modificación del aspecto,
C – Pérdida parcial o completa del aspecto de la superficie original.

ISO 10545-14: Determinación de la resistencia a las manchas
Determinación de la resistencia a la mancha, manteniendo la cara vista en contacto con diversas soluciones de ensayo, durante 24 horas. Transcurridas las mismas, se limpia la superficie de las baldosas con diferentes agentes de limpieza. Y finalmente, se examinan para detectar cambios irreversibles de aspecto. La clasificación varía de 5 a 1. Siendo el 5, cuando las baldosas se limpian fácilmente y el 1, cuando es imposible limpiar la superficie.

Clasificación según el nivel de radioactividad: Clase A (norma GB 6566)

Technical information

· ISO NORMS ·

Finished product standards ·

According to the UNE-EN-14411 specifications standard, our products belong to the following groups:

PORCELAIN TILES: Group BIa, dry-pressed tiles, with a rate of water absorption E≤0.5%.
FLOOR TILES: Group BIIa, dry-pressed tiles, 3<E≤6%.
WALL TILES: Group BIII, dry-pressed tiles, E>10%.

Test standards

ISO 10545-2: Determination of dimensions
Sets forth the methods for determining dimensional characteristics (length, width, thickness, straightness of sides, rectangularity and surface planarity).

ISO 10545-3: Determination of water absorption
Water absorption is a measure of the greater or lesser rate of porosity of the tile body. The test determines the amount absorbed by pieces, after being submerged in boiling water for two hours.
The rate of water absorption is expressed as a % with respect to the dry mass of pieces.

ISO 10545-4: Determination of bending strength
A tile's bending strength is determined by applying a force on the middle of the top side of the piece. The force applied is increased until the tile breaks. Bending strength is expressed in N/mm^2.

ISO 10545-7: Determination of the surface abrasion resistance of glazed tiles
The resistance of the glazed layer of tiles to abrasion is determined by applying a rotating abrasive load on the tile surface and visually inspecting pieces that have undergone testing against those that have not. Classification ranges from PEI 1 to 5.
In order to determine the suitability of ceramic floor tiles, their wear resistance must be known. This is influenced by not only the characteristics of tiles, but also by the place where they will be installed. The presence of abrasive materials (sand, gravel, etc.) and locations in areas with direct outdoor access are factors which shorten the lifespan of floor tiles.
Our floor tiles have been classified into five groups, which determine their resistance to abrasion and wear:
PEI 1: Floor tiles exposed to light traffic, on which soft-soled footwear is used, free from abrasive products Recommended in bedrooms and bathrooms in private homes, with no direct outside entry.
PEI 2: Floor tiles exposed to average to light traffic, on which soft-soled footwear is used. Recommended for all rooms in single-family homes except kitchens, entranceways, stairways and terraces.
PEI 3: Floor tiles exposed to average traffic, on which normal footwear is used. Recommended for all rooms in private homes and hotels, except for common areas such as stairways, entrances, etc.
PEI 4: Floor tiles exposed to average to heavy traffic. Recommended for all types of single-family homes and multiunit dwellings, terraces, kitchens, business premises and offices. Not belonging to this group are all public places exposed to intense traffic such as tobacconists', news stands, bakeries, bar areas, public transport stations, etc.
PEI 5: Floor tiles adapted to highly intense traffic. Recommended in shopping centres, train/bus stations, airports, etc.

ISO 10545-9: Determination of resistance to thermal shock
Determination of the resistance to thermal shock by cycling complete sample tiles ten times between 15ºC and 145ºC.

EN-101: Surface hardness
Surface hardness determines the capacity of resistance of the glazed surface to scratching. Tiles are classified on a scale of 1 to 10 based on the increasing hardness of the minerals used to scratch their surface.
The MOHS hardness scale is as follows:

1 talc - 2 gypsum - 3 calcite - 4 fluorite - 5 apatite - 6 feldspar - 7 quartz - 8 topaz - 9 corundum - 10 diamond.

ISO 10545-11: Determination of crazing resistance
Determination of the resistance to the formation of fissures in the glazed layer by subjecting whole tiles to steam at a pressure of 5 Kg/cm^2 in an autoclave, after which a dye is applied to the glazed layer and tiles are examined to detect possible fissures.

ISO 10545-12: Frost resistance
This establishes a method whereby whole tiles are soaked in water and then undergo 100 freezing-thaw cycles, between + 5ºC and - 5ºC.

DIN-51130: Determination of the critical slippage angle. Ramp
This method is called "sloping ramp method", too. The tiles to be test must be installed on a platform that you could adjust the high, taking a total room of 100 cm. x 50 cm. Inmediately after, a coat of oil is applied on the surface and on the soles of the technician, who will make the test. The technician walks on the platform, which will increase the angle from the horizontal gradually. Until, the slippery signs will be detected by the technician.
As a result of this test, we get the maximum angle to permit a safe traffic on the tile. Angle Group.

Angle	Group
6°< a <10°	R9
10°< a <19°	R10
19°< a <27°	R11
27°< a <35°	R12
35°< a	R13

UNE-41901 EX: Determination of slip resistance rating. Pendulum
The equipment consists of a pendulum whose arm measures 510 mm., to which a 76x25 mm. rubber slider is attached. Pendulum height is adjusted so that the slider remains in contact with the surface for a run of 126 mm. +/- 1 mm.
The sample is submerged in water for a minimum of 30 minutes prior to testing.
Each tile is tested in two opposite directions (0º and 180º), with the tile surface being

Rd	Class
Rd < 15	0
15< Rd <35	1
35< Rd <45	2
Rd>45	3

ISO 10545-13: Determination of chemical resistance
This test determines the chemical resistance of tiles to cleaning agents, swimming pool additives, acids and alkalis, except for hydrofluoric acid (HF) and its compounds.
The visual classification of high concentrated acids and alkalis can be HA/HB/HC; low concentrated acids and alkalis can be LA/LB/LC; cleaning products and swimming pool salts can be A/B/C, according to the chemical resistance grading.

A – No visible effect
B – Noticeable/obvious appearance modification
C – Partial or complete loss of surface appearance

ISO 10545-14: Determination of resistance to stains
Determination of resistance to stains by maintaining the tile face in contact with different test solutions during 24 hours. Once such time has passed, tile surface is cleaned with different cleaning agents. Finally, tiles are examined in order to determine irreversible changes in aspect. The classification rate varies from 5 to 1. Number 5 is achieved when tiles can be easily cleaned and number 1 corresponds to those tiles, whose surface is almost impossible to be cleaned.

Clasification according the radioactive level: Class A (norm GB 6566)

Consejos de colocación, limpieza y mantenimiento

1 · COMPRUEBA EL ALBARÁN Y VERIFICA EL PRODUCTO ·

Revisa que el material recibido se ajusta al pedido de compra realizado. En el exterior de la caja dispones de toda la información relevante para realizar esta comprobación.

2 · PREPARA LOS MATERIALES QUE VAS A NECESITAR ·

Asegúrate de disponer de las herramientas necesarias para realizar la correcta colocación de material. A saber:
Cemento de agarre
Ventosas
Nivel manual tiralíneas y flexómetro
Cuñas de nivelación
Crucetas
Pasta de rejunte
Paleta
Llana dentada de 10mm
Cubo, esponja y fregona
Llana de limpieza
Mazo de goma blanca
Pinza de tracción ajustable

3 · PRIMERO EL REVESTIMIENTO ·

Comenzaremos la colocación del revestimiento para no generar posibles desperfectos al pavimento en su colocación. Para ello respetaremos el espacio necesario para su posterior instalación.

4 · COMPRUEBA LA NIVELACIÓN ·

En caso de observarse pequeños desniveles aconsejamos el uso de mortero de nivelación, también conocido como autonivelante, para asegurar una superficie homogénea, lisa, sólida y compatible con los adhesivos utilizados en la instalación de cerámica. El tipo de autonivelante y el espesor de la capa a utilizar dependerá del uso (interior/exterior), del tránsito previsto y del desnivel a compensar posibles desperfectos al pavimento en su colocación. Para ello respetaremos el espacio necesario para su posterior instalación.

5 · COMPRUEBA QUE LA SUPERFICIE ESTÉ EXENTA DE POLVO ·

Para una correcta adhesión de la pieza se debe comprobar que la superficie esté limpia de polvo, cal, grasas y humedad.

6 · PLANTEA LA LINEA MAESTRA ·

La línea maestra debe ser paralela al pavimento. Te ayudará a plantear la instalación y a optimizar la cantidad de material cerámico utilizado.

7 · MANIPULA CORRECTAMENTE LAS PIEZAS ·

Ajusta la manipulación al tamaño de la pieza. Los grandes formatos deben ser transportados por dos personas evitando la flexión de la pieza en aquellas piezas de espesor fino. Para ayudar en este proceso puedes ayudarte de ventosas.

8 · SELECCIONA LA DISPOSICIÓN DE LAS PIEZAS ·

En Peronda trabajamos colecciones con gran variedad de gráficas para dotar de la mayor naturalidad a las estancias. Es recomendable plantear las distintas piezas en la superficie antes de aplicar el cemento de agarre para asegurar una estética óptima.

9 · SELECCIONA EL CEMENTO DE AGARRE SIGUIENDO LAS INDICACIONES ·

Es necesario el uso de cemento cola para la correcta colocación de las baldosas. Existen cementos con diferentes propiedades de elasticidad y adherencia que varían en función del material a colocar, del lugar de instalación y de la climatología. Aconsejamos cementos C1 para revestimiento interior de porosa blanca y C2 para revestimiento y pavimento interior y exterior de porcelánico.

10 · EXTIENDE EL CEMENTO DE AGARRE SOBRE LA SUPERFICIE YA NIVELADA ·

Siguiendo la línea maestra debemos extender con ayuda de la llana dentada el cemento de agarre sobra la superficie ya compactada y nivelada.

11 · REPARTE EL CEMENTO SOBRE LA PIEZA CERÁMICA ·

Realizaremos el llamado doble encolado aplicando, además de sobre las paredes y suelo, también sobre la costilla cerámica el cemento cola. Debemos asegurarnos de que la capa de cemento es homogénea en todas las piezas y aplicarla con la llana dentada en dirección perpendicular al lado largo de la pieza.

12 · INSTALA LA PIEZA ·

Siguiendo la línea maestra colocaremos la pieza apoyándonos con la maza de goma, dando ligeros golpes que ayuden a salir las pequeñas bolsas de aire que puedan haber quedado dentro del cemento cola. Debemos respetar una junta mínima de 2mm entre piezas. Para ello nos ayudaremos de crucetas de separación.

13 · SISTEMA DE NIVELACIÓN ·

Recomendamos los sistemas de nivelación de las empresas Raimondi, Peygran o Rubi, entre otras. Todas ellas disponen de un sistema de clips y cuñas aplicadas con pinzas de tracción que asegura la correcta colocación del material.

14 · RESPETA LAS JUNTAS MÍNIMAS ·

El tamaño de la junta depende de los siguientes usos.

	PAVIMENTO INTERIOR	PAVIMENTO EXTERIOR	REVESTIMIENTO INTERIOR	FACHADAS
JUNTA DE COLOCACIÓN	>0,5 mm >2 mm para grandes formatos	>0,5 mm >2 mm para grandes formatos	>1,5 mm	>2,5 mm
JUNTA PERIMETRAL	>5 mm	>5 mm	>5 mm	>5 mm
JUNTA DE PARTICIÓN	>5 mm	>5 mm	>5 mm	8-10 mm
JUNTA ESTRUCTURAL	La misma que la junta estructural de soporte	La misma que la junta estructural de soporte, incluyendo cordón de poliuretano o perfil de compensación	La misma que la junta estructural de soporte	La misma que la junta estructural de soporte, incluyendo cordón de poliuretano o perfil de compensación de 6 a 35 mm

15 · RESPETA EL TIEMPO DE SECADO ·

Por lo general deberemos dejar un tiempo de secado de 24 horas, aunque para información más específica debemos atenernos a las recomendaciones de tiempo de secado del fabricante del cemento cola utilizado en la instalación.

16 · SELECCIONA EL MATERIAL DE REJUNTE ·

De acuerdo con la UNE EN 13888, Es indispensable adecuar el material de rejunte al tipo de junta y a las condiciones de la superficie. Dividimos entre uso interior y exterior. Se presenta a continuación un cuadro en el que se detalla la tipología de rejunte a utilizar.
CG1 – Rejuntado cementoso normal
CG2 – Rejuntado cementoso mejorado
RG – Resina sintética (epoxi generalmente)

	PAVIMENTO INTERIOR	PAVIMENTO EXTERIOR	REVESTIMIENTO INTERIOR	FACHADAS
JUNTA DE COLOCACIÓN	CG2	CG2 RG para usos alimetarios, sanitarios y de agresividad química	CG1, CG2, RG en zonas húmedas	CG2
JUNTA PERIMETRAL	Mínimo CG2	Mínimo CG2 RG para usos alimetarios, sanitarios y de agresividad química	Mínimo CG2	Mínimo CG2
JUNTA DE PARTICIÓN	Mínimo CG2	Mínimo CG2 RG para usos alimetarios, sanitarios y de agresividad química	Mínimo CG2	Mínimo CG2
JUNTA ESTRUCTURAL	Mínimo CG2	Mínimo CG2 RG para usos alimetarios, sanitarios y de agresividad química	Mínimo CG2	Mínimo CG2

17 · PREPARA Y APLICA EL MATERIAL DE REJUNTE ·

La preparación es similar al cemento cola. Se mezcla con agua a proporciones indicadas por el fabricante. La colocación se realiza en la separación entre piezas utilizando una llana de rejuntado. Importante respetar los tiempos de recado recomendados por el fabricante de rejunte.

18 · RETIRA EL MATERIAL SOBRANTE Y LIMPIA LA SUPERFICIE ·

Tras la colocación es esencial una correcta limpieza de sobrantes de rejunte y restos de obra. Es esencial retirarlo antes de que se endurezca. Para ello evitaremos utilizar el producto Fila Deterdek o el producto Fila CR10 en el caso de juntas epoxi.
A continuación se recomiendan los productos a utilizar para un correcto mantenimiento de la cerámica instalada.

Accede al código QR y visualiza el manual técnico de colocación de gran formato.

Tile-laying tips, cleaning & care

1 · CHECK THE DELIVERY NOTE AND THE PRODUCTS ·
Make sure that the delivered goods coincide with the order. The outside of the box shows all the information you need to carry out these checks.

2 · PREPARE THE REQUIRED MATERIALS ·
Make sure you have the required tools to lay the tiles. That is:
Bonding adhesive
Suction pads
Spirit level, chalk line reel, tape measure
Levelling wedges
Spacers
Grouting material
Trowel
10mm notched trowel
Bucket, sponge and mop
Foam-rubber cleaning float
White rubber mallet
Adjustable tile levelling pliers

3 · FIRST LAY THE WALL TILES ·
Start by laying the wall tiles to avoid damaging the flooring. Make sure that enough space is left to lay the floor tiles afterwards.

4 · CHECK THAT THE SUBSTRATE IS LEVEL ·
In the event of a slightly uneven substrate, use a self-levelling mortar to create a uniform, flat, solid surface compatible with the bonding adhesive used to lay the tiles. The type of self-levelling mortar and thickness of the layer will depend on its application (indoors/outdoors), the envisaged traffic, and the original unevenness.

5 · CHECK THAT THE SUBSTRATE IS DUST-FREE ·
To ensure a firm bond between the tiles and the substrate, check that the surface is free from dust, plaster or lime, grease and moisture.

6 · MARK A STRAIGHT LINE WITH THE CHALK LINE ·
Mark a straight line with the chalk line parallel to the tiles to be laid. This will act as a reference when the tiles are laid, while also helping to optimize the number of tiles you use.

7 · HANDLE THE TILES PROPERLY ·
How they are handled will depend on the size of the tiles. Large-format tiles should be carried by two people. In the case of slimline materials, do not allow them to sag or bow in the middle. To assist in the process, suction pads can be used.

8 · PLAN THE LAYOUT OF THE TILES ·
Peronda's collections feature a wide variety of different designs to bring greater realism to living spaces. For optimum end results, plan the layout of the tiles by positioning them on the surface to see what they look like before applying the bonding adhesive.

9 · FOLLOW THE INDICATIONS WHEN CHOOSING THE BONDING ADHESIVE ·
The appropriate cement-based adhesive for the tiles must be used, given that there are ones with different elasticities and bonding strengths to suit different types of tiles, the place where they are laid, and the climate. We recommend the use of C1 cement-based adhesives for porous white-body indoor wall tiles and C2 adhesives for indoor and outdoor porcelain wall and floor tiles.

10 · SPREAD THE BONDING ADHESIVE ACROSS THE LEVELLED SUBSTRATE ·
Using a notched trowel, spread the bonding adhesive across the level compact substrate.

11 · SPREAD THE BONDING ADHESIVE ACROSS THE BACK OF THE TILES ·
Use the floating and buttering method–not only applying the adhesive to the wall and floor surfaces but also spreading it across the back of the tiles. Make sure that a uniform layer is applied to all the tiles, using the notched trowel to spread it perpendicular to the long side of the tile.

12 · LAY THE TILES ·
Using the chalk line as a reference, lay the tiles on top of the bed of adhesive and tap them with a rubber mallet to release any tiny air bubbles that might be trapped in the adhesive. Leave a tile joint of at least 2 mm between the tiles, using spacers to maintain the same distance.

13 · LEVELLING SYSTEM ·
When rectified tiles are laid, the Raimondi, Peygran or Rubi levelling systems should be used. This system of clips and tile wedges, fitted with tile levelling pliers, ensures a level tile surface.

14 · INSERT THE NECESSARY JOINTS ·
The width of the joints will depend on the following uses:

	INDOOR FLOORS	OUTDOOR FLOORS	INDOOR WALLS	FAÇADES
TILE JOINT	>0,5 mm >2 mm for big formats	>0,5 mm >2 mm for big formats	>1,5 mm	>2,5 mm
PERIMETE JOINT	>5 mm	>5 mm	>5 mm	>5 mm
PARTITION JOINT	>5 mm	>5 mm	>5 mm	8-10 mm
STRUCTURAL JOINT	The same as the structural joint in the substrate	The same as the structural joint in the substrate, including a compensation profile or polyurethane beading	The same as the structural joint in the substrate	The same as the structural joint in the substrate, including a 6-35mm compensation profile or polyurethane beading

15 · COMPLY WITH THE NECESSARY DRYING TIME ·
Generally speaking, the tiles must be left to dry for about 24 hours, although the recommendations of the manufacturer of the bonding adhesive used to lay the tiles must be followed.

16 · CHOOSE THE RIGHT GROUTING MATERIAL ·
In accordance with the UNE EN 13888 standard, the right type of grouting material for the type of joint and surface conditions (indoors or out) must be used. The table below shows the type of grouting material to use in each case.
CG1 – Normal cementitious grout
CG2 – Improved cementitious grout
RG – Synthetic resin (generally epoxy)

	INDOOR FLOORS	OUTDOOR FLOORS	INDOOR WALLS	FAÇADES
TILE JOINT	CG2	CG2 RG for contact with food, sanitary use, or contact with strong chemicals	CG1, CG2, RG in wet areas	CG2
PERIMETE JOINT	Minimum CG2	Minimum CG2 RG for contact with food, sanitary use, or contact with strong chemicals	Minimum CG2	Minimum CG2
PARTITION JOINT	Minimum CG2	Minimum CG2 RG for contact with food, sanitary use, or contact with strong chemicals	Minimum CG2	Minimum CG2
STRUCTURAL JOINT	Minimum CG2	Minimum CG2 RG for contact with food, sanitary use, or contact with strong chemicals	Minimum CG2	Minimum CG2

17 · PREPARING & APPLYING THE GROUTING MATERIAL ·
The grouting material is prepared in a similar way to the cement-based adhesive. It is mixed with water, as per the manufacturer's indications. Use a grouting trowel to fill the joints between the tiles. Always comply with the drying times stipulated by the grout manufacturer.

18 · REMOVE ANY SURPLUS GROUT & CLEAN THE SURFACE ·
After grouting the tiles, they must be properly cleaned to remove any surplus grout or other residues. This must be done before the grout sets. In the case of epoxy tile joints, do not use Fila Deterdek or Fila CR10 for this purpose. Shown below are recommended products for cleaning grouted surfaces.

Enter with the QR code and view the technical manual for laying slabs.

Normas de limpieza y mantenimiento

· LIMPIEZA DE REJUNTE ·

Una vez rejuntado y justo después de la primera limpieza con esponja húmeda, es posible dejar el material ya completamente limpio, evitando el posterior "empañado".
Los productos de la marca FILA **INSTANT REMOVER** (para junta cementosa) y **EPOXY PRO** (para junta epoxi) permiten una colocación completa, impecable y conforme a la normativa UNE 138002 en el mismo día del rejuntado.
Las soluciones INSTANT son rápidas, no crean espuma, no necesitan aclarado y no decoloran las juntas.

· LIMPIEZA DE FINAL DE OBRA ·

Después de la colocación es fundamental realizar una buena limpieza con el fin de eliminar residuos de junta y en general suciedad de la obra. Para esta operación recomendamos el empleo de un detergente de acción ligeramente ácida que no despida humos tóxicos y respete las juntas, el material y el usuario, como FILA**DETERDEK**. En el caso de material colocado con junta epoxi o en base resina, se aconseja realizar la limpieza final de obra con un limpiador específico de residuos epoxi, como FILA**CR10**.

· LIMPIEZA DE MANTENIMIENTO ·

Para un buen mantenimiento del pavimento se aconseja el empleo de un detergente neutro y con alto poder limpiador como FILA**CLEANER** que no deja residuos ni empañados. En los casos de suciedad intensa e incrustada acumulada en el tiempo, se aconseja consultar el esquema a continuación para encontrar el producto Fila ideal para cada situación.

TIPO DE SUCIEDAD INCRUSTADA	SOLUCIÓN FILA
Residuos de cemento de colocación Residuos calcáreos Rayas metales, depósitos de óxidos.	**DETERDEK**
Residuos de junta epoxi Vitrificada, resinosa.	**CR10**
Suciedad orgánica ligera (limpieza diaria)	**CLEANER**
Suciedad orgánica intensa (comidas, bebidas, grasas, aceites) Residuos de detergentes y jabones Goma, neumáticos, tintes, rotulador Gotas de pintura plástica.	**PS87**
Pintadas de grafitis Spray acrílicos, alquídicos y nitro sintéticos.	**NOPAINT STAR**
Residuos de silicona Cera de velas, resinas árboles Residuos cinta adhesiva Residuos de espuma de poliuretano Residuos de pegamentos, etc.	**ZERO SIL**

Cleaning and maintenance

· INSTANT CLEANING OF FRESH INSTALLATION RESIDUES ·

Following grouting, and just after initial cleaning with a moist sponge, it is possible to leave the material completely clean, avoiding possible clouding.
INSTANT REMOVER (for cement-based grout) and **EPOXY PRO** (for epoxy grout) help you make installation complete and impeccable, on the day of grouting. INSTANT solutions are fast, they don't create foam, they don't need rinsing, and they do not discolour the joints.

· CLEANING AFTER LAYING ·

We suggest a good initial cleaning after the laying on the floor or wall, this is very important for removing residual grouting and the normal dirt coming from the building works.
We suggest the use of a lightly acid product that doesn't emit fumes that are harmful for the user and that can attacks joints, such as FILA**DETERDEK**.
In case of material layed with epoxy or resinous grouting, we recommend to clean after laying with a specific epoxy detergent, such as FILA**CR10**

· REGULAR MAINTENANCE ·

For a good cleaning of the floor we suggest the use of a neutral detergent with a high cleaning power, such as FILA**CLEANER**.
In case of strong dirty and encrusted by the time, we recommend to consult the following scheme to find the perfect solution to every situation.

TYPE OF ENCRUSTED DIRT	FILA SOLUTION
Cement-based epoxy residues, saltpetre Limescale deposits Metal scratches	**DETERDEK**
Epoxy grout residues	**CR10**
Light organic dirt (daily)	**CLEANER**
Heavy organic dirt Grease, oil, soft drinks, food, sauces Rubber, tyres Dyes, marker, plastic paint Residues of detergents, soaps and waxes	**PS87**
Grafitis Acrylic, alkyd, and nitrosynthetic spray	**NOPAINT STAR**
Silicone and glue residues Zero sil Polyurethane foam residues Adhesive tape residues, around suckers Candle wax, tree resin	**ZERO SIL**

Sostenibilidad y medio ambiente_Sustainability & environment

POLÍTICA MEDIOAMBIENTAL_ ENVIRONMENTAL POLICY

PERONDA GROUP S.A. ha asumido el compromiso de establecer, implantar y mantener un sistema de gestión de la calidad de sus actividades basado en la Norma UNE-EN ISO 14001.

En línea con la filosofía medioambiental de la organización, el principal objetivo de este sistema de gestión es el respeto y la protección del medio ambiente, basado en los siguientes principios:

- Compromiso de cumplir con los requisitos legales y los requisitos aplicables.
- Compromiso con la protección del medioambiente, incluida la reducción y/o prevención de la contaminación.
- Fomentar los procesos innovadores y eficientes, con el objetivo de reducir los impactos ambientales asociados, la contaminación a la atmósfera, las emisiones de CO_2 y los residuos generados.
- Compromiso para aumentar la flexibilidad de los procesos de producción y mejorar la productividad mediante el aumento de la calidad de nuestros productos y la eficiencia de nuestros procesos.
- Compromiso con la formación y sensibilización del personal: Proporcionar formación y sensibilización ambiental continuada a todos los empleados de la empresa con el fin de aumentar y mejorar su competencia profesional, su adaptación a los nuevos cambios y procesos innovadores y mejora de la actitud positiva hacia la sostenibilidad.

La dirección de **PERONDA GROUP, S.A.** se compromete a transmitir y hacer cumplir la política ambiental en todos los niveles de las organizaciones y en todas las etapas del proceso de producción.

As part of its global mission to reduce pollution, combat global warming and contribute to sustainability, **PERONDA GROUP S.A.** has committed itself to establishing, implementing and maintaining a quality management system for its activities, based on the UNE-EN ISO 14001 standard.

In keeping with the company's environmental philosophy, the main aim of this management system is to care for and protect the environment, based on the following principles:

- To comply with legal requirements and any other applicable ones.
- To protect the environment, including the reduction and/or prevention of pollution.
- To promote innovative efficient processes in order to reduce associated environmental impacts, atmospheric pollution, CO_2 emissions and generated waste.
- To boost the flexibility of production processes and to improve productivity by raising the quality of Peronda's products and the efficiency of its processes.
- Staff training and a raised environmental awareness: To provide ongoing environmental training to all the company staff in order to boost their professional skills, help them to adapt to new changes and innnovative processes, and foster a positive attitude to sustainability.

The Management of **PERONDA GROUP, S.A.** undertakes to make the company's environmental policy known and to ensure compliance with it at all levels of its different organizations and in all stages of the production process.

ECONOMÍA CIRCULAR_ CIRCULAR ECONOMY

Todos los productos de la marca PERONDA están fabricados siguiendo un modelo de producción basado en la ECONOMÍA CIRCULAR, en concreto en la reutilización de las aguas residuales de proceso, reutilización de los residuos de atomizado utilizados y en el uso de material reciclado en el conformado de las baldosas cerámicas. Esta metodología de fabricación está en línea con la filosofía sostenible seguida por la empresa en todas sus actividades basada en la minimización del consumo de recursos naturales y desechos generados y priorizando el uso de materiales reciclados con el fin de minimizar el impacto ambiental.

-Todas las referencias fabricadas en PERONDA contienen un % de material reciclado certificado mediante la norma ISO 14021, logrando obtener productos más sostenibles y respetuosos con el medio que nos rodea.

All products sold under the PERONDA brand name are manufactured in accordance with a CIRCULAR ECONOMY production model and, more specifically, the re-use of wastewater in the process, the re-use of waste spray-dried powder, and the use of recycled materials in the composition of the tiles. This manufacturing model is coherent with the sustainable philosophy followed by the company in all its activities, based on the minimized consumption of natural resources and generated waste and on the prioritized use of recycled materials in order to keep the company's environmental impact to a minimum.

- Every product reference in PERONDA contains some % of recycled material (certified by ISO 14021), achieving a more sustainable and environmental friendly product range.

CALIDAD_ QUALITY

Quality management system in compliance with ISO 9001 norm. Certifies a continuous improvement of processes, products and services, the objective of which is the complete satisfaction of all our involved parties.

Sistema de gestión de la calidad basado en la norma internacional ISO 9001. Certifica la mejora continua de todos los procesos, productos y servicios de la organización con el objetivo de aumentar la satisfacción de todas nuestras partes interesadas.

This declares that our products comply with the stipulations of the CE marking, under which a product must be assessed before it is put on sale and comply with the applicable health, safety and environmental requirements.

Declara la conformidad de nuestros productos con los requisitos establecidos en el Marcado CE que establece que un producto es evaluado antes de ser introducido en el mercado y que cumple con los requisitos de seguridad, salud y protección medioambiental aplicables.

The CCC certificate is compulsory for products exported to China. It guarantees that products with a low water absorption rate (E<0.5%) comply with the safety and quality requirements.

El Certificado CCC es un sistema de certificación obligatorio para las exportaciones a China que garantiza que los productos con baja absorción de agua (E<0.5%) cumplen con los requisitos de seguridad y calidad establecidos.

This is a product approval certificate, issued by the French Institute CSTB, who verifies the technical suitability of top quality products in relation to the type of use intended.

Es una certificación de aprobación de productos, emitido por el Instituto Francés CSTB, y verifica la idoneidad técnica de productos de primera calidad en relación al tipo de uso destinados.

MEDIO AMBIENTE_ ENVIRONMENT

Environment management system in compliance with the UNE-EN ISO 14001 standard. Certifying system for application requirements which guarantee minimization of environmental impact, according to our commitment to sustainability.

Sistema de gestión medioambiental basado en la norma internacional ISO 14001. Sistema que certifica el cumplimiento de todos los requisitos legales de aplicación y garantiza la minimización de los impactos ambientales asociados a los procesos de la organización en línea con nuestro compromiso de sostenibilidad.

An Environmental Product Declaration in compliance with the UNE-EN ISO 14025 standard, which provides environmental info based on the lifecycle of our products.

Es una Declaración Ambiental de Producto de conformidad con la Norma UNE-EN ISO 14025, que proporciona información medioambiental basada en el ciclo de vida de nuestros productos.

CERTIFICACIÓN
LEED
BREEAM

Sustainable building certification systems developed by US Green Building (LEED) and Building Research Establishment (BREEAM), which promote the "ecologic" buildings, using environmental-friendly constructional practices.

Sistemas de certificación de edificios "ecológicos". Promueven la construcción de edificios sostenibles en base a prácticas de construcción más respetuosas con el medioambiente. Todas las baldosas cerámicas contribuyen a una edificación/ construcción más sostenible de los edificios y a la obtención de puntos LEED y BREEAM. Con ello se consigue un aumento de la calidad de vida y el bienestar de los habitantes de este planeta mediante el logro en las viviendas y edificios de ambientes interiores más saludables.

An environmental label for the French market, which provides information on the VOC content (volatile organic compounds). It declares that our products are rated A+, contributing to a healthy environmentally-friendly habitat.

Etiqueta medioambiental para el mercado francés que informa sobre el contenido en COV's (Compuestos Orgánicos Volátiles). Declara que nuestros productos son de tipo A+, contribuyendo a un hábitat sano y respetuoso con el medioambiente.

Las baldosas cerámicas una vez que llegan al final de su vida útil son un residuo inerte, que para su correcta gestión debe ser entregado a un gestor autorizado de residuos, favoreciendo su reciclado. **Once ceramic tiles reach the end of their useful life, they are inert waste. For their proper management, they should be given to an authorized waste management body for recycling purposes.**

Debido a los procesos de impresión, los colores que aparecen en este catálogo deben considerarse aproximados, y no exactos. **All colours and hues appearing in this catalogue should be considered approximate, only in view of the printing processes involved.**
